[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Fluent in English, French, and Persian

Summary

Bilingual (English/French) software developer with hands-on experience across full-stack projects (React, Node.js, MongoDB) and QA/testing (manual testing, API validation with Postman and Thunder Client, defect tracking). Comfortable translating requirements into working features and collaborating closely with cross-functional teams to ship quality releases. A continuous learner, currently deepening expertise in Java and Spring Boot, and constantly building new projects independently — including an e-commerce platform currently in development.

Skills

- **Languages:** JavaScript (ES6+), Java, Python, TypeScript, SQL, HTML5, CSS3
- **Front-End & Back-End:** React, Angular, Node.js, Express.js, RESTful APIs, Spring Boot, JWT & bcrypt authentication
- **Databases:** MongoDB, MySQL, SQLite, Oracle
- **QA & Testing:** Manual Testing, Functional Testing, API Testing, RestAssured, Postman, Thunder Client, cross-browser testing, regression testing, Jira
- **Computer Science Fundamentals:** Data Structures & Algorithms (active LeetCode practice), Object-Oriented Programming (OOP)
- **Version Control & Cloud/DevOps:** Git, GitHub, GitLab, AWS, Microsoft Azure (AZ-900 certified), Docker
- **Methodologies:** Agile, Scrum, Sprint Planning, SDLC, CI/CD
- **AI-Assisted Development:** ChatGPT, Claude AI, and Gemini, used daily for debugging and accelerating learning of new concepts
- **Professional Skills:** Trilingual communication (English/French/Persian), cross-functional collaboration, continuous learning, adaptability, problem-solving

Work Experience

Academic Lab Tutor | George Brown College, Toronto, ON 2024 – 2025

- Reviewed and tested 20+ student software projects across Python, JavaScript, and SQL, documenting bugs with clear descriptions, reproduction steps, and severity levels
- Wrote SQL queries to validate outputs against expected results, helping students catch data inconsistencies on their own
- Guided students one-on-one through code reviews and full-stack development concepts, tailoring explanations to individual skill levels across a diverse student cohort

Software Developer / QA Tester | Azarpad Niroo (Remote) 2023 – 2024

- Helped build front-end features, including the login page (HTML, CSS), under guidance from senior developers
- Verified that completed features matched documented requirements, user stories, and acceptance criteria before sign-off
- Tested API endpoints using Postman to confirm correct responses, and worked with stakeholders to translate business requirements into testable criteria

Quality Assurance Analyst (Part-Time) | Fara Tavan 2021 – 2023

- Tested 10+ UI components for cross-browser and screen-size compatibility, logging bugs with clear reproduction steps

- Verified that each component met requirements before sign-off, following documented testing checklists
- Reported defect status and collaborated with the development team to confirm fixes, communicating across English and Persian language contexts for localized websites

Customer Service Representative | Scotiabank

2022 – 2023

- Assisted 20+ clients daily with banking transactions, maintaining accuracy and following established security and compliance procedures
- Followed regulatory guidelines and internal policies to protect client data and meet quality standards
- Built positive client relationships through clear, bilingual communication and consistent, professional service

Projects

Doctor Appointment App

- Designed and built a full-stack MERN application independently, end-to-end, with a modular architecture to support maintainability and future scalability
- Implemented JWT-based authentication, bcrypt password hashing, and role-based access control (RBAC) as core secure coding practices, and integrated Stripe for payment processing
- Validated authentication and data flows using Postman and Thunder Client, confirming CRUD operations executed correctly against MongoDB

Food Delivery App

- Designed, built, and deployed a full-stack MERN application independently, end-to-end, taking full ownership from concept through launch, with user authentication and a full order flow from browsing to checkout
- Monitored the live application after deployment and used Postman to verify checkout and order-flow reliability, catching and resolving post-launch issues

Resume Builder

- Researched and integrated the OpenAI API independently as a proof-of-concept for AI-assisted content generation
- Validated the AI integration endpoint using Postman before deploying on AWS free-tier infrastructure

BizHorizon (Capstone)

- Partnered with a four-person cross-functional team through requirements analysis, solution design, and Agile delivery to launch a business web application, producing technical documentation throughout

E-Commerce Platform (In Progress)

- Building a full-stack e-commerce application independently and end-to-end as an ongoing project, taking full ownership from design through deployment and expanding skills in API design

Education & Certifications

Advanced Diploma, Computer Programming and Analysis — George Brown College, 2025

Dean's Honor List (5 consecutive semesters) | GPA: 3.73/4.0

Master's Degree, Education

Microsoft Azure Fundamentals (AZ-900) — Certification Prep, Microsoft Press

Using Python 1: Organize and Analyze Data — University of Toronto

Python for Data Science, AI & Development — Coursera

TEF Canada — B2 (Reading, Writing, Speaking), C1 (Listening Comprehension)
